Survey Solutions by CREOSO

CREOSO unites the simplicity of interactive touch screen applications with convincing customer feedback and self-service information solutions.

CREOSO's powerful software programs are designed to promote the input and output of paperless information at the point of sale, point of care and point of service. You can ask, inform, and attract customers year round while significantly reducing workload, costs and paper waste.

## About CREOSO's Survey Solutions

### Serving the Marketing Research Industry since 2003

We are passionate about survey solutions that are reliable, versatile, innovative, easy-to-use and give real value to our customers. As one of the early pioneers in touch screen computer assisted surveys we have the experience and knowledge required to design convincing, feature-rich survey solutions useful for all types of research.

Our Digivey™ survey software is a globally renowned survey software program for creating, collecting and reporting surveys using kiosks, touch computers and tablet PCs running under the Windows operating system.

The Digivey™ survey software supports multilingual questionnaire design, branching, skipping, piping, randomization, rotation, multimedia integration, customizable survey appearance, mixed-mode survey data collection, instant reporting and much more.

Digivey Survey Software Modules For Use with Survey Kiosks

**RELIABLE, ENGAGING, USER-FRIENDLY,  
MODULAR**

# QUICK FACTS DIGIVEY™

## Modular

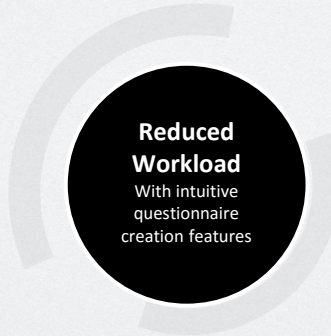

The Digivey Survey Suite has a modular, task related software architecture.

The modular software architecture makes it possible to install only the modules needed for the task on hand. E.g. for data collection with kiosks and tablets only Digivey Launcher is needed.

## Feature-Rich

Create surveys, quizzes and assessments quickly and easily with Digivey Composer.

Visually appealing and structured survey questionnaires entice respondents to complete surveys, quizzes and assessments.

## One-Step

The one-step data entry to reporting process eliminates data entry errors and manual data tabulation.

Gain instant insights into survey data without spending time and money on manually compiling reports. With just a few clicks, the survey reports are ready to use.

# Digivey Composer Module

Questionnaire Creation For All Type of Digivey Surveys

## Main Features:

## Digivey Composer™

### Fast and easy questionnaire creation

Composer is a feature-rich survey authoring tool for the creation of professional questionnaires for surveys, quizzes and assessments.

Supports common closed-ended and open-ended question types

Interactivity logic: Branching, skipping, piping, other tools

Customizable survey appearance and branding

Special features: Randomization, multilingual questionnaires, ....

Available as subscription or conventional software license

# Digivey Launcher Module, Windows

## Collect customer feedback with kiosks

### Main Features:

## Digivey Launcher™

### Reliable data collection 24/7

Digivey Launcher collects data in a continuous loop until stopped by the survey administrator.

It is a full screen application. Users are restricted to touch pre-determined buttons.

Full screen application

Start and stop surveys or run in continuous loop

Apply optional settings like hide/unhide questions

Compatible with other Digivey modules

Mixed-mode compatible (combine data with other Digivey data)

Available as subscription or conventional software license

# Digivey Analyzer

## Survey Reporting Module Of The Digivey Survey Suite

### Main Features:

## Digivey Analyzer™

### Create survey reports with a few clicks

As survey results are imported into Digivey Analyzer, it collates and tabulates the results instantly. Charts and descriptive statistics can be viewed within just a few moments.

- Survey reporting tool for the desktop as well as online (RP Server)
- Variety of data filters
- Pre-formatted top-line report with and without cross tabulations
- Customizable data export in a variety of formats
- Available as subscription or conventional software license

# Digivey Data Shuffler™

## Automate project and data management

### Main Features:

## Data Shuffler™

### Upload projects / download data

With the help of Data Shuffler users can remotely upload new or edited survey projects to survey stations, survey kiosks and tablets. \*

At the same time survey data can be automatically downloaded to servers or networks periodically or each time a survey is submitted.

This module requires internet connection.

One time set-up of project uploads/data downloads

Several options: Network, Server, HTMLML, Sftp, Ftp; OneDrive

Automatically synchronizes target and recipient side

No limitations re uploads/downloads of projects & data records

Available as subscription or conventional software license
